**ROOISAND CC Desert Ranch is a member of**

NAPHA(Namibia Professional Hunting Association)

NTB (Namibia Tourism Board) and of

HAN (Hospitality Association of Namibia)

**ROOISAND actively supports**

GOBABEB, an international project for studying the relationship between arid areas (deserts), ecology (protection of the environment) und human activity.

The project is also supported and funded by the German foreign aid organization GTZ (Deutsche Gesellschaft für Technische Zusammenarbeit), among others.

Since 1962, the Centre has been one of Southern Africa's foremost centres of arid lands research. Its new focuses on appropriate technology and training mean that the Centre remains highly relevant to sustainable development in Namibia and Southern Africa as a whole.

From time to time and on demand Rooisand Desert Ranch is supporting international research projects. In the year 2002 we host a team of scientists from the University of Giessen / Germany, who was working at a project of Arachnologie (Spiders).
