

Fly Drone Safari

Drone flying is not permitted in Namibian National Parks, but at ROOISAND an unique activity has been created, which allows guests to head out into the wilderness to capture aerial footage with their own drones.

PLEASE NOTE that all drones in Namibia (commercial, hobby or recreational) must be registered with the Namibian Civil Aviation Authority (NCAA) at least 60 days before arrival. To register a private /hobby drone and receive a formal Letter of Approval (which needs to include permission for every intended flight) costs N\$ 1200.00. More about these regulations is available at [NCAA \(Namibian Civil Aviation Authority\)](#)

For further information please [contact us](#).
