

Fly Drone Safari

Drone flying is not permitted in Namibian National Parks, but at ROOISAND an unique activity has been created, which allows guests to head out into the wilderness to capture aerial footage with their own drones. An experienced guide with sound knowledge of drone flying protocols will conduct the experience.

We also offer flight lessons with a Mavic Pro Platinum drone to guests that do not own a drone. All pictures and footage taken during these flight lessons will be made available to guests.

For further information please [contact us](#).

Important notice:

It is imperative to obey the guides orders and rulings at all times.

Safety precautions do not allow drone flying near buildings or animals, but the guide will advice techniques on how to maximize the most amazing aerial perspectives from the

African sky.
